

VAIBHAV PANDEY

Software Developer & TechLead | AI Engineer

+91-9131683087 | pandeyvaibhav459@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Developer, Tech Lead & AI Engineer with 4+ years of experience delivering production software and 2+ years leading product development, architecture, and cross-functional teams across 4 live applications & Product. Experienced in taking products from 0→100%—from business requirements, roadmap and feature prioritization through system design, development, testing, deployment, and production support.

Strong in full-stack engineering with Node.js, TypeScript, React.js, Next.js, Python, Java, PostgreSQL and MongoDB, alongside GenAI/LLM development using OpenAI, Gemini, Claude, LangChain and ChromaDB. Experienced in REST API architecture, AI integration, conversational AI, authentication/RBAC, scalable systems, performance, error handling, and technical stakeholder collaboration, with enterprise AI delivery for Fortune 500 clients.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS .
- **AI / GenAI:** GenerativeAI, LLM Integration, Prompt Engineering, OpenAI API, Google Gemini, Claude, LangChain, ChromaDB, Conversational AI, AI Chatbots.
- **Backend:** Node.js, Python, Java, Express.js, NestJS, REST APIs, JWT Authentication, RBAC, Sequelize, Mongoose, API Validation, Error Handling .
- **Databases:** PostgreSQL, MongoDB, MySQL, Schema Design, Indexing, Query Optimization.
- **Cloud / DevOps:** AWS, Azure, GCP, Docker, Git, GitHub Actions, CI/CD, Vercel, Postman.
- **Testing / Product:** Jest, API Testing, QA Collaboration, Code Reviews, Production Troubleshooting, Product Requirements, Roadmaps, Feature Prioritization, Technical Planning, Cross-functional Collaboration.

KEY ACHIEVEMENTS

- **Techstars Boston Fall 2024** — Core Tech Lead on TruLeague, a peer-engagement edtech platform accepted into one of the world's most competitive startup accelerators; defined backend architecture and led full-stack delivery under real startup conditions.
- **Tech Lead** — 4 Production Applications — Led architecture decisions and coordinated teams of developers across TruLeague, AI Ershad HRMS, Chasi, and Shopura — all live, all serving real users across distinct industries.
- **50% Reduction in Manual HR Operations** — Architected executive dashboards and automated attendance workflows for AI Ershad HRMS, eliminating manual HR tracking and surfacing real-time workforce analytics.
- **Enterprise AI & Chatbot Development** — Built and deployed production-grade enterprise chatbots on Kore.ai for Fortune 500 clients using JavaScript and Node.js; certified Kore.ai Advanced Developer (Kore.ai Academy, 2023).
- **Fortune 500 Technical Delivery** — Delivered DITA-structured documentation and developer guides for HP's global engineering teams and Kore.ai's enterprise platform across multiple international product lines.
- **Top Performer** — 3 Certifications + AI Engineer Path — Ranked Top Performer in DSA, Frontend, and Backend Full Stack (Coding Ninjas); completed The AI Engineer Path (Scrimba, October 2025); currently completing AI-Powered Product Management (UpGrad).

PROFESSIONAL EXPERIENCE

Unitop Educations Private Limited — Tech Lead & Full-Stack Developer

April 2024 – March 2026

TruLeague — (Techstars Boston Fall 2024) · Live

- Led 0→100% product and technical development, translating business requirements into product features, technical roadmap, architecture, sprint priorities, and production releases while coordinating a 4–5 member engineering team.
- Architected and delivered 100% of the backend REST API layer using Node.js/TypeScript, establishing structured services for scalability, validation, authentication, error handling, and reliable production performance.
- Drove AI engineering initiatives by integrating LLM/API capabilities, prompt-driven workflows, and AI-ready backend services to enable intelligent product features and automation.
- Improved engineering delivery efficiency by 40% through architectural standardization, 30+ reusable Next.js components, code reviews, reusable development patterns, and stronger coordination between product and engineering.

AI Ershad Workforce Management System — HRMS Platform · Live

- Owned 0→100% product and technical delivery, converting HR/business requirements into product workflows, system architecture, development priorities, and production releases while leading a 4–5 member team.
- Automated workforce operations across attendance, check-in/check-out, leave management, compliance workflows, and centralized reporting, eliminating manual HR tracking.
- Built and structured the system-wide REST API foundation with validation, error handling, scalable data flows, and 5-role JWT + RBAC security for HR Managers, Supervisors, Admins, Employees, and CEO.

- Delivered executive reporting dashboards that reduced manual HR operations by 50% and surfaced real-time workforce insights for business decision-making.

Chasi — Automotive Service Marketplace · Live

- Led product architecture and full-stack development for a MERN automotive marketplace connecting customers and garages across 3 user roles, owning the complete service-booking lifecycle.
- Designed and implemented REST APIs, JWT authentication, and RBAC, establishing secure and maintainable backend workflows for customer and business operations.
- Built 30+ reusable React components, accelerating team feature delivery by 40% while improving frontend consistency and maintainability.

Mphasis — Software Developer & Technical Writer, HP & Kore.ai Projects

March 2022 – December 2023

Kore.ai

- Built and deployed enterprise chatbots on the Kore.ai platform using JavaScript and Node.js, designing conversational flows, custom scripts, and dialog integrations for production-grade chatbot features used by enterprise clients.
- Extended Kore.ai platform functionality through custom Node.js scripting, combining coding and documentation responsibilities across the same product.

HP

- Collaborated directly with frontend developers on interfaces, contributing to backend-to-UI integration logic and bridging the gap between engineering and end-user documentation.
- Produced DITA XML-structured hardware and software documentation using Oxygen XML Author and Adobe FrameMaker, adopted by HP's global support and engineering teams across multiple product lines.

Radtel — Technical Writer

December 2021 – January 2022

- Created and managed product and website content using a CMS; developed DITA-format technical documentation for client-facing products and services.
- Led collaboration with UX teams to align content and design with business goals; contributed to content style guides and messaging strategies.

LIVE PROJECTS

Shopura — Full-Stack E-Commerce Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT Auth

- Built a production-ready e-commerce platform end-to-end — user authentication, product catalog, shopping cart, and order management — independently designed, developed, and deployed on Vercel.
- Engineered secure REST APIs for users, products, and orders using Node.js + Express.js with Mongoose ODM, implementing JWT-based auth with protected route handling.
- Developed a fully responsive React.js frontend integrated with all backend services, tested across devices and screen sizes.
- In progress: AI product recommendations (OpenAI API), Razorpay payment gateway, and an admin analytics dashboard.

CERTIFICATIONS

- The AI Engineer Path — Scrimba (October 2025)
- Kore.ai Experience Optimization Platform — Developers Advanced Training, Kore.ai Academy
- Back End | Full Stack Web Development in Node.js — Coding Ninjas (Top Performer)
- Front End | Full Stack Web Development — Coding Ninjas (Top Performer)
- Data Structures & Algorithms in Python — Coding Ninjas (Top Performer)

EDUCATION

- KTUJM — Master of Arts in Mass Communication (MAMC), 2020
- St. Thomas College — Bachelor of Arts in Journalism & Mass Communication (BAJMC), 2018
